Registering a Patient

The screenshot shows a mobile application interface for registering a patient. At the top, a dark green header bar contains a back arrow, the title 'Register Patient', and three progress indicators. The first two indicators, labeled 'Personal Details' and 'Medical Information', show a checkmark. The third indicator, labeled 'Location & Consent', shows a location pin icon. Below the header, the main content area is light gray. It features a section titled 'Location & Consent' with the subtitle 'GPS location and patient consent'. Inside this section, there is a white card for 'GPS Location' which states 'GPS location not captured' and has a green button labeled 'Capture GPS Location'. Below this is another white card for 'Patient Consent' containing a consent statement and an unchecked checkbox labeled 'Patient provides consent' with the note 'Required to register patient'. At the bottom of the screen are two buttons: a light green 'Previous' button and a dark green 'Register Patient' button.
